1. Attached as Annex "A" are the figures for the 1952 nonferrous metal supplies and distribution up to the end of the third quarter. Notable are the following points:

- (a) Supplies of the principal metals were up to or beyond those planned.
- (b) Supplies of bronze and antimony were greatly in excess of the original plan, the latter chiefly from Chinese imports.
- (c) There was a large increase in the supply of magnesium all of which came from the only two plants in East Germany producing this metal, i.e. Rackwitz¹ and Elektrochemische Kombinat Bitterfeld, but no export took place.

2. Imports during the third quarter of 1952 came from the following countries:

USSR: Copper
 Lead
 Bronze
 Tin
 Cobalt
 Zinc
 Nickel
 Mercury
 Cadmium

Poland: Zinc

Bulgaria: Lead

- Comments: 1. There has been no change in the figures for chromium, molybdenum and tungsten.
 2. Miscellaneous includes the end of year balance, return stock and various small acquisitions.
 4. These figures show the withdrawal of allotments from East German consumers in favor of Russian-sponsored ones.
 5. The heavy reduction of the East German allotment in favor of Russian-sponsored organizations can be noted.
